

AutoEase IT

- *Autolease Administration made easy*

Is your administration system built like a jigsaw puzzle?

Yes, you can build an admin system from off the shelf packages, like putting together a jigsaw, but it's the missing pieces that take all your time.

Now there is an admin system built specifically for the independent auto lease, contract hire or sales operation. Instead of a disjointed approach using a Word Processor, a Spreadsheet, a Contact Management (CMS) System, an Accounts package and Email you can now have one comprehensive, easy to manage solution, which presents the processes required to go all the way from enquiry to delivery.

Autoease IT is a server/client multiuser system working on either Windows Linux or Macintosh based on the popular Filemaker Pro* database authoring software.

Process management - don't let leads and customers drift

Designed to respond to the specific user the process management prompts the user in what to do and when to do it.

With so many parts to track from enquiry through to financial proposal and timely delivery, not to mention insurance, part exchange and vehicle maintenance packages, it is essential that the whole process is tracked and checked with no black holes for sales to drop into. The AutoEase IT process management tracks communications as well as sales processing and is time based giving the user the necessary prompts and feedback to keep things moving ahead efficiently.

AutoEase IT saves time and money as well as ensuring customer satisfaction that will bring your clients back for their next vehicle.

What does it cover?

We thought it would be easier to say what AutEase IT didn't do but we couldn't think of anything. If you've ever wanted all your data in one place - here it is.

Here are just some of the areas covered:-

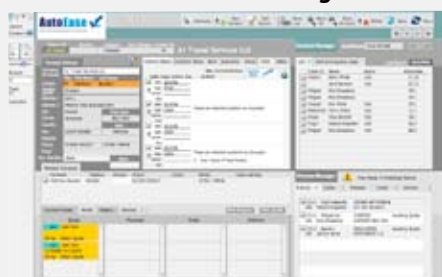

- New and used sales, new and used contract hire, lease hire, finance purchase, hire purchase, contract rental, short term rental, part exchange, fixed and variable maintenance and insurance
- Handles Finance Quotes from various sources.
- Keeps track of vehicle maintenance, fines, customer and vehicle histories
- Generates payment schedules, invoices and purchase orders.
- Produces instant management reports, turnover, profit/loss and activity levels - totals or by customer/vehicle. Keeps customer and vehicle histories
- UpToDate pricing (can be used with CAP).

What's the cost?

Autoease IT is sold on a rental basis and starts at £175 month for a 3 user system. Further users can be added and are charged on a sliding scale. This price includes all training and continuing support as well as an upgrade path. Filemaker Pro client is required for each user as well as Filemaker Server both of which can be provided by Softrack at a very competitive rate.
